

Benchmark Construction and Evaluation-Integrity Controls

1 Project isolation

20 UNKNOWN_HELDOUT projects never enter the TEST gallery

2 Evidence isolation

PRIVATE GROUND TRUTH
source project · path · source hash · scenario · K

FINAL ATTRIBUTION EVIDENCE
identity-neutral CODE / STRUCTURED / IMAGE only

leakage boundary

3 Freeze discipline

Select threshold / α / λ / β / M / Kmax on CAL only → freeze before TEST → no retuning in robustness, ANN, or failure analysis
